GREETINGS FROM THE PROGRAM COMMITTEE

Welcome to IJCNN '92 !

The International Joint Conferences on Neural Networks held in recent years have been memorable and provided excellent opportunities for the dissemination of the latest information in the neural networks research and related fields. And IJCNN' 92-Beijing will be another exciting meeting.

The Proceedings consist of 563 papers which are organized into 30 oral sessions with 245 papers, 3 poster sessions with 205 papers and 113 abstracts. The topics range from theoretical studies to practical applications, and from biological models to artificial implementations. Many contributions are made by world famous authorities in our circle while many more are by a great number of young researchers and promising students from the countries all over the world. Surely, the IJCNN' 92-Beijing will be a successful meeting.

As one of the program co-chairs, I want to give special thanks to Dr Harold Szu, Dr R. Eberhart, Prof S. Amari, Dr R. Newcomb and all members of the Program Committee for their valuable and efficient efforts in publicity, paper soliciting, and paper reviewing as well as cooperation in organizing the conference. I also want to thank Dr P. Werbos, Prof R. Marks II, Prof R. Eckmiller, and Dr K. Fukushima for their ideas, instructions and leadership. Many debts are owed to Dr Lin Xuduan, Dr Pan xinan, Dr Du Limin, Dr Wang Yaoguang and my doctorial student Wang Minghui for their patient work in the proceedings preparation and editing. I am very grateful to all paper authors for their enthusiastic support to the conference. Without these the proceedings would not be able to appear.

Yi X. Zhong
Program Co-Chairman
Prof of BUPT
