Subject: Can Artificial Intelligence Take Over The World?

[View this email in your browser](#)

Are human minds doomed to become obsolete?

Hey Oso Gang!

This week we will have Dr. Robert Marks speaking about the capabilities of Artificial Intelligence and how it relates to our Christian worldview. Dr. Marks is a Distinguished professor of Computer and Electrical Engineering, and was one of the panelists at our Does God Matter panel.

We won't be meeting over Thanksgiving break so that you can have some extra time

with the people you love, but we will be back on November 30 with Kyle Huitt, the philosopher from the Does God Matter panel. So, stay tuned for that!

What are you interested in? We're planning our next semester and we want your input! Fill out this [form](#) to let us know how we can best accommodate your interests.

Can't wait to see you all tonight! We will have a limited amount of FREE pizza at the meeting.

In Christ,
Spencer King
President, *Oso Logos*

"Get choke respect fo Christ cuz he stay inside you an he stay spesho fo God. Erytime stay ready fo tell anybody dat aks you how come you know eryting goin come out good fo you."

1 Peter 3:15 (Hawaii Pidgin Version)
